

Our manufacturing includes the digital design and manufacture of marine electro-hydraulic winches, reels, davits and other handling equipment for survey operations. DWSII is dedicated to providing innovative, cost effective products which meet our client's specifications. All of our i-winch® and i-deck® products are designed using SolidWorks® modeling software.

 **i-winch®** line of products - *intelligent . . . innovative . . . integrated*

Standard winch specifications provide for electro-hydraulic or electro-mechanical operation with a wide range of drum sizes for various survey applications.

- Series 1000 - Light Duty up to 10HP.
- Series 3000 - Medium Duty up to 250HP
- Series 5000 - Cantilever Winch up to 50HP.

Customize your winch with the following options:

- i-winch® Display and Information Systems
- Optional Line Speed, Pay-out & Tension
- Hydro-Active Level Wind or Diamond Screw Level Wind
- Remote Control, wired or wireless
- Remote i-winch® Display
- Slip Rings - electromechanical or fiber optic
- Grooved drum liners
- Optional materials - aluminum or stainless steel
- Explosion Proof Certification

 **i-deck®** line of products - *inventive . . . integrative . . . inspiring*

- davits, A-frames
- streamer reels
- self contained hydraulic power packs
- air gun handling equipment
- digital deck design, layout & installation
- AUV deployment/recovery systems

DWSII offers worldwide, full service technical support, installation assistance and training. Our i-winch® and i-deck® systems are customized to meet our clients requirements and in finding solutions that save time and money while maximizing performance. Our technological innovations are designed and implemented with safety as a key feature.
