Marine Integrated Survey System

Marine Products

Survey & Technical Services

Source Only Services (SOS)[™]

For centuries, the best Surveyors have turned to new technology to improve productivity and accuracy. Continuing with our reputation in providing quality data acquisition systems and survey services, we are taking our Marine Integrated Survey System[™] (MISS[™]) development to a new level in our solution to provide quality source services for life of field or other programs that require the source only. Our MISS[™] source packages implement our unique Roll-On/Roll-Off (RO-RO) design of state-of-the-art source subsystems coupled with our field proven i-winch[®] and i-deck[™] products which provide the critical element of our Source Only Services (SOS)[™].

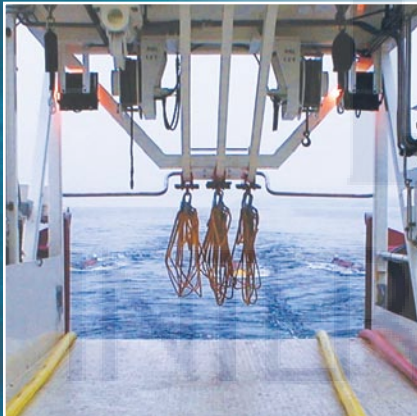

Our attention to detail and understanding the harsh offshore environment aids us in developing these intelligent and interactive MISS[™] source packages that result in our SOS[™] survey team's ability to safely and consistently collect quality source data time after time.

Our SOS[™] team of professionals have worldwide experience and the proven ability of safely acquiring the most comprehensive and accurate survey data, on time and within budget.

We believe our SOS[™] answer provides our customers the quality source service they require to complete their critical life of field challenges . . . *Anytime . . . Anywhere . . .*

Since 1998, DWSII has maintained a comprehensive Quality, Health, Safety and Environmental (QHSE) program which covers all aspects of our business. All of our employees or team members are dedicated to insure they integrate our QHSE program into their daily activities and assist management with maintaining a clean and safe workplace whether onshore or offshore. Established in 1986, DWSII is a certified small, woman owned business.

DWSII's experience and expertise in marine geophysical systems and surveying is combined with our dedication to providing economic solutions which meet or exceed our customer's goals...

Anytime . . . Anywhere . . .
